DOMINATOR *The Shipyard where luxury takes shape*

Dominator is not just shape, beauty and luxury but also, and indeed most importantly, substance. We are skilled in responding to the needs of our clients, who consider yachting one of life's pleasures, rather than a fashion trend.

Founded in 1999, the shipyard is based in Fano (Italy) and offers a range of top quality motoryachts. Our exclusive models stand out for their high production quality, reliability and sailing comfort.

Each model is designed and produced through the close working relationship between a team of international top-designers and the shipyard's technical office which covers all the engineering features of the yacht development and building process.

The Dominator philosophy is to design and build custom-made yachts. Owners can make their yachts unique, in keeping with their way of understanding and experiencing the sea. This is possible by means of special technical and furnishing solutions, and the use of valuable materials and top quality finishes, enabling the shipyard to satisfy an extensive range of different expectations and demands.

Typically Italian styling and design are combined with Dominator's custom-made spirit and the soundness and reliability of the yachts: an incomparable match.

Today, the Dominator fleet comprises yachts **640 - 680 - 720 - 780 - 860** and **880**, and ships **29M - 40M**.
