INTRODUCING

A dynamic power catamaran

The progressive Leopard 43 Powercat highlights all of the advanced features that have come to be associated with the Leopard line. Built by Robertson & Caine and exterior design by Simonis Voogd Design, this member of the power fleet is a completely redesigned mid-sized catamaran built with a quality foundation.

The Leopard 43 PC is the logical extension of the very successful Leopard 51 PC. This contemporary catamaran boasts economy, is easy to handle, and spacious with 27% more interior volume than her predecessor.

Her new hull design amplifies her speed and agility. From the large flybridge, manoeuvring this powercatamaran is not only simple, it's enjoyable.

Her interior layout is in-line with an all new generation of Leopard Catamarans. With increased indoor and outdoor living space, she promotes a convivial atmosphere. The functional design also makes her exceedingly user-friendly.

There were no details left unattended in the creation of this new power yacht, including the hull design, speed, standard specifications, updated interior, and much more.

CRAFTSMANSHIP

Stability, range and luxury

The new exterior of the Leopard 43 Powercat is superior to many other power models for various reasons. The superior hull design and the solid foundation that Leopard Catamarans are built upon play a part.

The stepped hull design of this powercat adds interior volume above the waterline, allowing for roomier accommodations in the hulls without sacrificing the performance of the yacht.

With narrower hulls and less wetted surface below the waterline, the Leopard 43 PC reaches an impressive maximum speed of 23+ knots (27 MPH) and maintains exceptional fuel efficiency consistent with all Leopard power catamaran models.

Navigation around the Leopard 43 PC is seamless and easy. Her large flybridge offers 360 degrees of unobstructed views, making navigation safe. The entire flybridge can also be totally enclosed in case of foul weather.

This area also includes a wet-bar and grill and seating for up to eight guests. She also offers a safe access to the sunbathing platform located forward of the flybridge.

COMFORT

An abundance of space and natural light

One of the most exciting and innovative interiors yet on a Leopard catamaran, the Leopard 43 Powercat includes the design of the new generation of Leopard Catamarans. In this new layout, the galley is located forward and the forward-facing settee and table are now located aft. This allows for a panoramic view with large sliding glass doors between the saloon and the aft cockpit.

This arrangement promotes easy communication for guests, an open flow between the saloon and the aft cockpit, and a fusion of indoor and outdoor living space. In addition, the galley area includes a large forward-facing window and an access door to the forward platform of the boat.

The access door enhances the open concept feel and easy navigation in and around the yacht, while also promoting ventilation throughout the interior.

INNOVATION

The Leopard Leap

The Leopard 43 Powercat represents the major advancements that Leopard Catamarans are making. This yacht performs at the highest level and its design is unmatched.

Enjoy sunrises and sunsets on the flybridge or in the aft cockpit. Soak up sunshine on the sunbathing platform. The amazing experiences the Leopard 43 Powercat can offer are amplified by her construction, design, aesthetics, advancements and capabilities.
