Description

CLB72 - A Born Entertainer, Exuding Warmth and Elegance

Designed for families with a heart for adventure, CLB72 proves how beautifully form and function can work together, fusing stunning design with impressive performance. Built upon the combined expertise of naval architect, Howard Apollonio, and leading marine structural engineers, Gurit, CLB72 pushes the boundaries of marine engineering to achieve an exceptionally lightweight and aesthetically balanced design, without compromising the integrity of its structure.

With classic lines at the exterior, the silhouette of CLB72 is timeless and elegant, while contemporary materials and finishes brings a modern touch to the interior. Plenty of space can be found both indoors and outdoors on the main deck, guests may choose to bask in the sun at the foredeck or beach platform, while those seeking respite from the sun will enjoy a sophisticated interior with a contemporary color palette within the salon. Expansive windows provide uninterrupted 360-degree view all around, bringing the outside in.

Below deck, luxurious accommodations include a full beam master with ensuite bathroom, fully-equipped ensuite VIP stateroom, and 2 more guest cabins, are all found here.

CLB72 features a RINA Hull Construction Certificate. She is built with a resin-infused, composite hull, and a foam-cored monocoque structure. Other advanced features include a gyro stabilization, an active interceptor system, and a CZONE monitoring system. This yacht reaches 27 knots powered by twin Volvo IPS 1050 pod drives.
