

Larson Cabrio 240

Year	2005
Price	\$68,000
Location	Sandringham

Overview

A very well-presented power boat/cruiser that ticks all the boxes.

At over 2500kg on the water, the Cabrio 240 is a big, solid, and comfortable boat to drive. The 20-degree V hull cuts through the water with the wide chine and long strakes helping the boat track cleanly and with relative ease. The hull features Larson's own notched hull design which is designed to create a wave of water pressure that 'lifts' the stern of the boat.

The vessel has everything you need to spend a day or full weekend on the water. Overall a great weekender for the couple or family.

Vessel Summary
