REMARKS

The Hull has been built to current professional standards and has been well maintained. The defects aforementioned should be attended to at the soonest opportunity. The above vessel is structurally sound and in my opinion is an insurable item. This report reflects and expresses the opinion of Slipstream Marine Enterprises Pty Ltd. All reasonable attempts to detect any defects present, however, there may exist hidden or latent defects, or those that cannot be discovered without interfering with the vessels structure. This report is given without prejudice and is for the exclusive use of Ryan Chen and no responsibility will be accepted for any other party without the written consent of the undersigned.
