## Fountaine Pajot

Founded by Jean-François Fountaine and Yves Pajot in France in 1976, Fountaine Pajot is now the world's leading manufacturer of cruising catamarans having built more than 2200 sail and power multihulls. With two state-of-the-art production sites in La Rochelle - the heart of one of the world's most important boatbuilding regions - Fountaine Pajot employs an elite multidisciplinary team of more than 400 people and is renowned for its continued investment in technology, production industrialisation, research and design.

#### Manufacturing

The construction of Fountaine Pajot catamarans includes verifications at every stage in conformity with ISO 9001. The fibreglass fabrics are checked before use and each stage of lamination is followed by an inspection. Pressure during vacuum-gluing operations is continuously measured and the quality of the result is systematically checked over the whole glued surface. The hardness of the composite is measured on each element using the Barcol procedure, and samples taken from each boat are kilntested in order to verify resistance to hydrolysis. The resistance to wear and weathering of the adhesives used for the lining and floors are also tested.

There is complete traceability of every unit that leaves the yard – a rigorous system essential for subsequent maintenance. The company's technical department and engine manufacturers conduct sea trials on all boats to guarantee delivery in perfect condition.

#### Quality Inspections

When completed, the boat goes to the test basin where all of its equipment is tested, and a sprinkler system checks the whole structure is completely watertight. For future reference, the technical department maintains a comprehensive file on every vessel, which contains the details of all the materials and products used and all equipment installed. Exact drawings of certain specific components are also archived, as well as samples of the composite.

#### I.C.N.N Product Certification

All Fountaine Pajot catamarans possess 'EC Type' I.C.N.N Product Certification in conformity with European directive 94/25 CE. The Fountaine Pajot yard is also the first French boat builder to have obtained ISO 9001 Quality certification for the entire production cycle of its vessels. This certification is an international standard designed to improve customer satisfaction, ensuring the company continues to build on its high standards of product and management procedures.

#### Safety

#### Unsinkability

Unsinkability and the bulkhead structure inside Fountaine Pajot's catamarans are key elements in their safety. Unsinkability is ensured by volumes of foam placed in the forward and rear extremities of the hulls.

#### ins

#### Fixed fins

For safety reasons the fins are completely separate components to the hulls – a feature that preserves and protects the watertightness of the boat in the event of a violent impact, and also makes them easier to repair or replace if required.

#### Shock-resistant fins

The use of fin keels over daggerboards provides numerous advantages: they are fixed and therefore require no manipulation; they give perfect protection to drive shafts, propellers, rudder blades and hull bottoms in the event of grounding; the absence of a daggerboard case saves space; their wind-tunnel designed profiles give exceptional performance and generate no turbulence or vibration.

#### Technology

Fountaine Pajot catamarans are built from a sandwich structure with a PVC foam core laminated under vacuum. Fountaine Pajot leads the industry in this technology, consistently making significant investment in the advancement of injection moulding technology to allow resin

injection at far higher pressure, delivering a lighter, stronger and more consistent product. For ultimate protection against hydrolysis, only isophtalic gelcoats are applied to hulls and decks by spray-gun. Also, the recent introduction of vinylester rather than polyester resins from the waterline down further enhances strength and hydrolysis resistance.

#### Custom-made fabrics

Fountaine Pajot, in collaboration with Chomarat, has designed their own fabrics with mono and multidirectional fibres in different weights in order to optimise the weight and structure of the boat. In accordance with the quality control process, for every model an exact sample of each fabric allocated to specific zones in the vessel is prepared and recorded. The choice and composition of fabrics differs according to the zone orientation to ensure fabric weights are optimised with respect to the stresses distributed throughout the boat.

#### Infusion Process

The entire structure of the boat is built up in layers of dry-bonded fabric. Under vacuum, the resin is able to penetrate into every empty space in a single operation, which affords multiple advantages: protection of the environment and anticipation of new regulations relating to solvents; improved working conditions, and a perceptible weight saving resulting in improved sailing performance.

### Mahé 36 Evolution

The popular Mahé 36 Evolution is arguably the best value entry level catamaran on the world market. With a host of technological and design innovations, the Mahé 36 Evolution makes catamaran sailing accessible to new clients on a reasonable budget while still offering the superior performance and construction qualities commonly found in larger and more prestigious catamarans.

The Mahé 36 Evolution was designed to meet three stringent objectives: to be affordable while offering excellent value for money, be ergonomic and comfortable, and lastly to possess outstanding sea performance with centralised handling.

With a sheltered open-plan cockpit, a clean and uncluttered deck layout, rigid cockpit bimini plus a raised helm station boasting 360-degree vision with centralised commands, the Mahé 36 Evolution's innovative exterior design complements its outstanding performance.

The spacious saloon measures 15m<sup>2</sup> (161.46ft<sup>2</sup>) and affords excellent headroom (1.95m), ample storage and unrivalled comfort. The catamaran has a spacious and practical galley, additional refrigeration, and superb ventilation and natural lighting in all interior living areas.

The Mahé 36 Evolution is available in two versions to satisfy the most demanding requirements of individuals and charter operators. The two-cabin version features two private suites with a door at the bottom of the companionways as well as two bathrooms. The three-cabin version features two double cabins and an exclusive Owner's Suite.

The Mahé 36 Evolution's cabins are impressive: generous in size, beautifully lit, well-ventilated and very private with exceptional cabin roof space, creating a comfortable retreat for owners and guests.

Whether weekend cruising or challenging the elements during offshore passages, the Mahé 36 Evolution simply excels offering outstanding performance in choppy conditions without compromising safety or comfort.

Already a favourite in the world's charter fleets, the Mahé 36 Evolution is also appreciated by multihull owners who recognise quality and performance at a surprisingly affordable price.

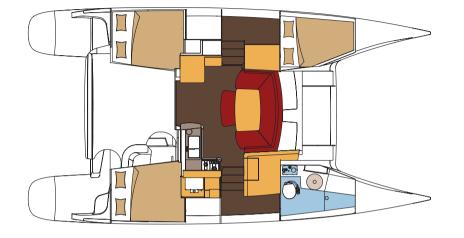

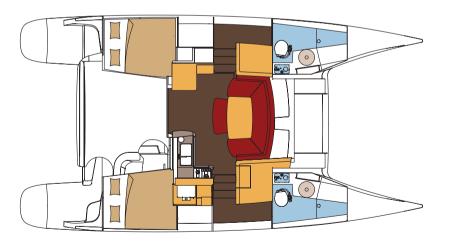

## Mahé 36 Evolution

LOA	11.00 m / 36.08 ft
Beam	5.90 m / 19.35 ft
Draft	1.10 m / 3.60 ft
Air Draft	16.75 m / 54.95 ft
Bridgedeck Clearance	0.65 m / 2.13 ft
Displacement	5 tonne
Sail Area Genoa	30 m² / 280 sq ft
Sail Area Mainsail	47 m² / 527 sq ft
Engines – larger optional	2 x 20 hp / 2 x 30 hp
Freshwater Capacity – larger optional	2 x 265 litre
Diesel Capacity – larger optional	1 x 200 litre
Architects and Designer	Joubert - Nivelt / Olivier Flahault Design
Layout Options	Standard – 3 doubles / 1 bathroom Owner's – 2 doubles / 2 bathrooms

Owner's Version

## Why Fountaine Pajot?

- Safety Fountaine Pajot catamarans are rated as "unsinkable".
- Performance / cruiser each has an excellent balance of performance and comfort.
- Ease of use all sailing catamarans are designed for easy handling by just one or two persons.
- Design and technology Fountaine Pajot's team of internationally renowned architects, designers and builders is continually improving the range to combine the very latest in design and technology.
- Value for money Fountaine Pajot catamarans offer proven, stylish designs and outstanding performance at an affordable price.
- Global brand Fountaine Pajot catamarans are recognised internationally, ensuring you enjoy worldwide service and support, plus easy availability of spare parts when required.

Fountaine Pajot's range of premier cruising catamarans offers an unparalleled combination of performance and comfort. With stylish designs featuring sleek lines and stunning contemporary interiors, each model is carefully appointed to make every voyage a pleasure. Fountaine Pajot's catamarans are available in a range of sizes and interior layouts to cater for every client's individual requirements, making them perfect for day trips, weekend sailing, coastal and offshore cruising.

#### Shipping

Fountaine Pajot catamarans are sailed/powered from the factory in France across the English Channel to Southampton where they are disassembled and loaded aboard selected suitable ships. This "sea trial" ensures all systems are in proper working order before the vessel is delivered to Multihull Solutions.

On arrival in Australia or New Zealand, Multihull Solutions oversees the transfer of the vessel from the ship to the dock and its launch into the water, where our team then handles the full commissioning process (eg. standing of mast, fitting of sails, biminis, electrical and gas compliance etc). A Multihull Solutions sales representative then manages all inspections and sea trials with the client before handing the vessel over.

If clients prefer to collect their vessel personally from the factory in France and make their own way back to Australia/ New Zealand, ex-factory handovers can also be arranged.
