## 2016 Azimut 50 Flybridge Vessel Specification

### Description

The Azimut 50 is a hugely popular model in Australia offering generous spaces, exceptional features and great capability. This 2016 model features the original 50 design which comprises 3 cabins and 2 bathrooms with a full beam master cabin that has an ensuite. The galley is positioned off a central companionway on the lower deck and benefits from a huge amount of light that enters through the main windscreen above. On the main deck large windows compliment the lounge, dining and helm areas and the sliding door means an indoor outdoor feel can be achieved.

Measuring nearly 53 foot overall and featuring the largest flybridge in the peer group, upstairs there is a large dining area forward and a space open area with lounges aft. Up there, there is also an amenity station with a bbq.

This 50 has a generous option list including joystick controls to both stations, a Dockmate remote docking control, 2-3 year old Williams Jet Tender on the hydraulic platform, bow and stern thrusters, crew quarters and more. Importantly, she has been anti-fouled in December 2023 and received very recent minor upgrades and detailing making her very ready for use.

### Highlights

- Anti-foul completed in December 2023
- Remote Dockmate vessel controller allows for easy manoeuvring
- Huge option list including tender, water maker, joystick and thrusters
- Major mechanical completed in 2021
- Mechanical servicing in early 2023

### Principal Information
