## **1999 Precision 40 FlyBridge – Works list and timelines – in the owner’s words.**

### **History**

- Her current owner Lincoln is only the second owner having bought her in April 2015
- Originally fitted out as an offshore-capable family cruiser, her first owner used her mostly for local family cruising in and around Sydney with their two boys. As such she had low engine hours and high genset hours when purchased
- The Precision 40 is renowned as a very capable offshore hull. Lincoln’s objective was to transform her into an offshore game fishing weapon which would also be capable of extended cruises up and down the East Coast in safety and comfort.
- The initial phase of the fitout project in 2016/2017 entailed teak decking, teak & holly interior flooring, replacing saloon front windows with custom enclosed fiberglass, new seaboard lazarette doors, air conditioning and extensive automation to support offshore fishing and coastal navigation based on Simrad EVO2 electronics
- The second phase in 2018/2019 entailed macerator pumps in the large kill tanks, plumbed tuna tubes, lighting and window in bait tank, replacement of Relax 80lb game chair with top-of-the-line 130lb Southern Stroker game chair/station and 15 new 130lb big game rod holders – each fully glass reinforced underneath. In 2020 the two cabins were fully reconfigured and updated with new side and headlining, LED lights, custom made innerspring mattresses and storage.
- The final phase 2021/22 saw the head/shower updated and the galley and saloon fully rebuilt by Italian interior shipwright, Prima Classe to bring Distraction up-to-date with new cruising flybridge design, cabinetry, table, upholstery, lighting and equipment. The head saw a new full size vacuflush toilet, cabinet, sink and plumbing including a new engine/electric hot water system, The galley was raised and expanded to make it more functional and sociable – integrating with the saloon space. New euro sinks and tapware, Corian benchtops and Vitrefrigo fridge/freezers. A larger flat screen TV integrated with laptop, WIFI and deck/fishing cams was built into the new cabinetry on a powered pop-up mount – concealed when not in use to provide additional usable bench space. New lounge suite utilizing the same upholsterer, materials, finish as new high end Maritimo cruisers. A second, dedicated air conditioner was installed under the raised galley floor to service the two forward cabins. Below the waterline Bradford Marine sand blasted, inspected, painted the hull using top of the line International epoxy and antifoul. They took the opportunity to do a full inspection of the hull which was found to be in excellent condition with no osmosis or damage. Shafts and props were rebalanced and through hull fittings replaced.
