2024MY Mancraft / Twin Mercury V12 600

Owners' description of inclusions.

Mancraft Marine 14 metre SuperFly. 16.7 metres overall length with motors up. 4.5 metre beam + fly sides.

2 x Mercury V12 600 HP engines. JPO docking and sky hook.

Integrated Mercury auto pilot.

Adjustable jacking plates for each engine to suit load when carrying a full size PWC.

Fuel capacity - 1520 litres. Dual fillers port and starboard for ease of docking at fuel stations.

Water capacity - 600 litres.

Black tank capacity - 50 litres.

PAX 20 persons. Reduces to 16 persons with up to 500kg PWC on board.

Top speed – 30+ knots. Full fuel. 50% water. 4 persons and gear.

Cruise easily at 25 knots.

Cruise economically at 21-22 knots at circa 100 LPH.

Hulls – catamaran hulls 1200mm high and 1200mm across. Built from 5mm 5083 marine grade aluminium. Survey approved internal bulkheads. Reinforced stem bars. Built in cofferdams to house 760 litre fuel cells each side and foam filled. These are super strong heavy-duty hulls not only capable of carrying a huge payload, but to withstand severe offshore conditions. These hulls have incorporated planning strakes for more speed and better fuel economy, coupled with the centre nasal hull make this a serious go anywhere rough water vessel.

Garmin Electronics – 2 x 24" screens + 1 x 9" screen in galley. Radar tower trimmed with stainless steel accents and twin Garmin domes and Garmin 24-mile Raydome. Transducer. C Zone integration. VHF and UHF radios. Twin black aerials.

Night vision camera. Wireless phone chargers x 4.

3 x 300-watt Victron solar panels. 900-amp Lithium house batteries. 2 x 1000cca start batteries. Victron sub station with 2 x DC – DC chargers. Multiple 100/50 solar controller 3. 3000-watt Victron multiplus inverter. Shore charger. Pop up GPO's. Separate Victron shore chargers for each start battery. Back-up generator.

Anchoring. Fitted with a heavy-duty stainless-steel drum winch, 50lb stainless steel anchor laced with 70 metres of 8mm short link stainless steel chain. Helm or remote operated.

Covers – Full 3-piece aft camping covers with roll up mesh. Extra pieces trimmed to fit around the Jet Ski and extra pieces for when the Jet ski is not on board. Aft cabin clears for when the weather is not so kind. Full bow seating covers. Aft and bow sunshade covers with carbon poles. Doggy doors that can be attached to the rear club lounge to keep the pets in the cabin area. All covers are easily fitted with sail track and bungee cords.

As outlined above, with the hull design and waterline length this can be a serious offshore vessel, however it is designed as a very versatile vessel that is a lot of vessels in one and has many differing uses. Fishing offshore. Coastal cruising. Broad water and river cruising. Diving. Snorkelling. Jet Skiing. Paddle boarding. Kayaking, and of course the party vessel. And all the uses of this vessel are carried out with ease. Drop the bow gate for a beach landing or a diving platform or picking up the crab pots. Drop the fly sides for extended fishing, relaxing or partying room. Drop the rear platform for Jet skiing, swimming, relaxing. This is a lot of boats in one. Very stable with the 4.5 metre beam. Very easy to operate. A dream to drive through Moreton Bay chop as the hull really cuts the water and the torquey Mercury 600 HP's really eat it up.
