Power Catamarans

8000 Westerner

The LeisureCat 8000 Westerner is the walkaround model with a difference. It features a larger cab than the StormCat giving better weather protection, a larger rear deck area, a lockup cuddy cab with plenty of room for stowage that includes an electric toilet.

The upholstered forward lounge seats have hinged tops for storage under. It has an optional electric setup that allows the cab to be moved to port or starboard at the touch of a button giving more room down the "fishing" side of the boat.

Recommended engine power is 2x150hp to 200hp 4-stroke outboards. The Westerner has all the standard LeisureCat safety features and includes their renowned wavebreaker for that soft ride.

*"LeisureCat... experience the difference!"*
