About the Company

Bering Marine is an affiliate of the Bering Group. Bering Marine specializes in building fast, seaworthy, and fuel-efficient hydrofoil-supported boats between 23' and 42' in length. Embracing a long history of quality steel and aluminum shipbuilding, Bering Marine is establishing its own, distinct line of rugged, multipurpose vessels.

Bering Marine uses HYSUCAT TECHNOLOGY

Our unique foil assist technology provides an optimal self-correcting dynamic. The foils carry between 40% to 75% of the vessel's displacement. This reduces the hulls' volume which greatly decreases drag and improves seakeeping.

Efficiency, sea-keeping, low wake wash, and decreased emissions provide substantial benefits to our customers. Reduced drag on the underwater sections of our vessel improves efficiency. This results in lower propulsion requirements, reduced fuel consumption, and a lighter vessel.

The hydrofoil wings create an inherent dampening effect, giving the vessel a much smoother ride. This enables the boat to operate at a higher average speed in rough and unpredictable seas. Lowered resistance and decreased propulsion power reduce wake wash signature which is beneficial for waterways that have wave wash restrictions and limitations. Additionally, the foil assists cat is the optimal form for the type of use that requires speeds over 30 knots.

Other Bering Marine advantages include operator friendliness — no special knowledge or skills required to operate — and a 30% reduction in fuel burn at operating speeds. The catamaran hull also provides higher initial stability for lower resistance and improved passenger comfort.

Hydrofoil-supported boats are produced at Bering Marine's shipbuilding facility in Antalya, Turkiye and serviced at the Bering Marine USA location in North Carolina (for US customers only). Our team of highly-qualified, experienced engineers is dedicated to make the best and most versatile vessels. Combining lightweight and sturdy aluminum with sleek and durable fiberglass, Bering Marine craftsmen develop boats that are both high-performance and safe.

Experienced in creating superyacht-quality vessels, our team is using this knowledge to bring usability and comfort to the Bering Marine family of rugged watercraft. Working together with leading equipment producers we are able to deliver a second-to-none boating experience to our users. At Bering Marine, our love of the sea and passion for making the best boats is what allows us to achieve and provide excellence to our customers.

BM 34

Bering Marine proudly introduces the BM34 Sport Fisher Hydrofoil Supported Catamaran. This new vessel is available with either a full or walkaround cabin.

BM34 Main Specifications

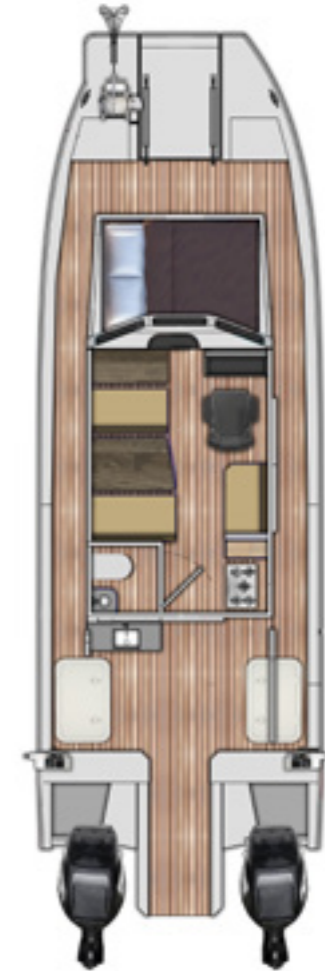

LENGTH	34'0" (10.4 M)
BEAM	10'11" (3.08 M)
HULL TYPE	ALUMINUM
DISPLACEMENT	14,800 LBS
MAXIMUM HP	800 HP
MAXIMUM CAPACITY	10 PEOPLE
MAXIMUM SPEED	42 KNOTS

Full Cabin

Walkaround Cabin

BM 34

FULL CABIN

BM34 Full Cabin

BM 34 Full Cabin is as powerful and rugged as the waters it is made for – and as comfortable and safe as any Bering boat, regardless of size.

At 34 feet, it has an impressive displacement of 14,800 pounds and can carry up to ten passengers. Marine-grade aluminum hulls and a sturdy beaching ramp provide worry-free landing. Hydrofoil technology provides up to 30% fuel efficiency. At a maximum of 800 HP, this boat is fast (up to 42 knots).

Our standard models utilize only the best materials and provide luxurious features ensuring a fishing experience like never before.

BM 34

BM34 Walkaround Cabin

Bold in design, this vessel gives you the freedom of movement along the shipboards, providing you with an unobstructed view and 360-degree fishing capability.

34 feet of marine-grade aluminum are ready to go far and fast. With the displacement of 14,800 pounds, it can carry all the necessary gear in addition to ten passengers. At up to 42 knots provided by the 800 HP engines, and an increased range due to the fuel-saving technology, this vessel is ideal for day trips, chartering, carrying passengers, or fishing.

WALKAROUND

BM34 Interiors

BM34

Our BM34 is optimally designed for performance and comfort in any condition. The walkaround cabin design gives you the freedom of movement, while the full cabin design guarantees protection from the elements. Regardless of your design preference, you will enjoy the unsurpassed safety and comfort of all Bering Marine products.
